---

I spoke with Ms. Jennifer Trainor from EA Engineering, Science, and Technology, Inc. yesterday regarding their FOIA request. The purpose of the conversation was to inform them that we may have responsive documents, but that because the Navy had prepared them, I had been advised by ORC that the Navy would have to give us permission to release them.

As it turns out, they had already seen the documents from another source, and did not need the ones I had found in the RC.

Consequently, Jennifer cancelled the Site Assessment portion of the FOIA request.
